

## Operations Support Technician – WATTS Rental FZE

**Company: WATTS Rental FZE**

**Location: Dubai, UAE**

### **Role and Responsibilities**

- Routine maintenance, pre and post-project, on transformer, substation and switchgear packages in the UAE facility.
- Support rental project sales with the preparation of drawings and specifications for inclusion in proposal documentation.
- Manage the organisation of the UAE facility and high-voltage electrical fleet to ensure the highest standards of equipment and facility conditions.
- Manage the inventory of operational spares and consumables materials required for the safe and efficient operation of the high-voltage electrical equipment fleet.
- Support in-field installation and commissioning of high-voltage electrical equipment in international locations, as required.

### **Qualifications and Experience**

- Internationally recognised electrical power qualification.
- Familiar with high voltage electrical safety and safe systems of work.
- Familiar with the safe operation of high-voltage electrical test equipment.
- Proficient in the use of AutoCAD or equivalent software to produce drawings and sketches.
- Experience of fault-finding, repair, and maintenance on high-voltage electrical equipment.
- Minimum 3 years relevant experience in testing and commissioning of packaged high voltage electrical equipment.
- Previous experience in executing projects in client locations.
- Able to travel freely internationally, sometimes at short notice.
