

Site Installation Engineer (Power & Distribution Transformers)

This is a fantastic opportunity for an experienced Transformer Engineer to join an established family-owned business based in Leeds. Wilson Power Solutions are a leading manufacturer and supplier of electrical power distribution equipment and pioneers of super low loss amorphous transformer technology. Our flagship product saves money, saves energy, cuts carbon and offers an innovative solution to the worldwide challenge of reducing energy wastage.

The Role:

Your duties will be a combination of site-work assembly of **Distribution and Power Transformers** including fitting, wiring and test at site and in-house production fitting and assembly work.

Key areas include:

- In-house fitting and assembly of various types of distribution and power transformers
- You will prepare work to be accomplished by studying assembly instructions, blueprint specifications, and parts lists; gathering parts, subassemblies, tools and materials
- Assembly of components by examining connections for correct fit; fastening parts and subassemblies
- From time to time, travelling to third party sites both in the UK and abroad to build up the equipment and test.
- Ensuring that all equipment is assembled and tested to the highest standard
- Reading and understanding mechanical and schematic drawings.
- Using general workshop machinery and hand tools related to the role
- Identifying and working with others to resolve inadequate or unclear manufacturing/engineering information
- Sometimes working unsociable hours when required to meet WPS demands, including site work as required
- Sometimes working abroad on special projects if the need arises

Skills, Knowledge & Experience:

- Experience and competence of working on site fitting distribution and power transformers is **essential**
- Hands on experience of working within a mechanical/electrical engineering environment is **essential**
- The ability to understand mechanical and schematic drawings is **essential**
- Apprentice trained or a Mechanical/Electrical qualification is **essential**
- Experience of Health & Safety and conducting risk assessments is **essential**
- You will have good written and verbal communication skills, with the ability to liaise with customers and resolve issues in a proactive and positive manner
- Strong trouble shooting skills
- Excellent attention to detail
- You will be flexible and adaptable and be prepared to attend site at short notice which may be outside your normal working hours
- Experience of working collaboratively with other operations personnel with the ability to train and enhance your work colleagues' skills.
- Ideally experience of working within a continuous improvement environment
- Ideally have up to date training on Overhead Crane/Slings Lifting certification
- Ideally have a FLT licence
- ECS accreditation is **essential**
- Ideally IPAF certification
- Full UK driving licence is **essential**

Salary and benefits:

- Salary negotiable
- 25 days holiday per year plus 8 bank holidays
- Company Bonus Scheme (paid qtrly)
- Two paid breaks
- Nine-day fortnight (37.5 hrs)
- Canteen facility with tea, coffee and milk provided
- 3 x salary death in service
- Healthcare scheme
- 2 weeks full pay paternity/maternity leave
- Pension
- Parking on site

Please email your CV along with a cover letter detailing your current salary to the HR Manager, hr@wilsonpowersolutions.co.uk. All applicants must be able to demonstrate their right to work in the UK.
